YEASTOLE
Is rich in the vitamins which prevent premature old age and sterility. 400,000 people in the United States die every year from diseases peculiar to old age, and 60,000 die before the age of 40 years. Many thousands more are made unfit from the effects of mal-nutrition and become susceptible to disease, this it has been ascertained is largely due to insufficient vitamins in the diet, without which life must cease. Yeastole corrects this. Large can 30 cents at Druggists and Grocers. 87tf

BANK BEGINS NEW ADVERTISING CAMPAIGN

With this issue of the Times the First National Bank begins a new campaign of advertising. We have several pieces of copy which are to appear, and each one of them contains a sparkling message on some financial subject. It will be very interesting reading for everyone.

In commenting on the campaign Willis Lehnhard said, "There are many things which the average person does not know about the banking business. That is not his fault—it is the fault of us bankers because we have never told him. We are going to try in our space in the Times to let our friends and neighbors know a lot of things that the First National can do for them, and mostly without any charge whatever. I think it is the duty of a bank to be a public servant of the community and we want the people of Monett to use this bank more."

HENS MAY SAVE AMERICA

Some prominent bankers and business men have recently stated that the profit from hens had been the salvation of American farmers.

Miller Purvis, in the Breeders' Gazette, says: "It would not frighten me at all to be deprived of all I have if I had only 100 hens to begin over with. I would have food and clothes and a bank account before the end of two years. I would not live sumptuously, but I would not miss a meal, nor lack clothing." We are sure Mr. Purvis would feed these 100 hens Quisenberry's Buttermilk Laying Mash. Three pounds of this feed with other particles of food the hens pick up, will make one dozen eggs.

Hens fed scratch grain alone become overly fat and will not lay. Quisenberry Buttermilk Laying Mash is guaranteed to practically double your egg yield. With this mash poultry raisers get an average of two hundred eggs per hen a year, and many hens have made records of over three hundred eggs a year on the same feed. This feed also stores vitality in the hen and in the egg. Prevents dead chicks in the shell, and insures fertility and big hatchings.

The Quisenberry Buttermilk Chick Starting Food will save loss of chicks at hatching time, prevent diarrhea, and insure rapid growth. No other feed equals it in results, regardless of make or price. This we guarantee.

Buy one hundred pounds of Buttermilk Laying Mash this week while we give free feeders with each sack. We guarantee more eggs if you feed according to directions and give hens proper care. Call at Whitlock-Lines, Monett, Mo., and get a sack. w25&dtf

PLYMOUTH PARENT-TEACHER ASSOCIATION

The Plymouth Parent-Teacher Association met Friday afternoon and enjoyed a very instructive child welfare program. Superintendent F. E. Engleman spoke on "The Necessity of Physical Care of Children in School." There are now thirty interested members at work in the Association and it is to be regretted that there are not more. Mothers should realize the necessity of taking a part for if not there is coming a time when the child will feel the need of the motherly interest other children are getting. Every mother is invited to attend the meetings. There will be more good programs.
